Save the Date!
September 24–26, 2013

Join us for the 2013 International Institute for Sustainable Laboratories (I²SL™) Annual Conference! What better place to host the largest annual gathering of sustainable laboratory and high-technology facility professionals in the nation than Minneapolis, Minnesota, one of the greenest cities in America. Enjoy the beauty, culture, and excitement of the “City of Lakes” while learning about the latest advancements in high-tech building efficiency, performance, and technology.

While the conference name has changed, its content, quality, and value have not. The 2013 I²SL Annual Conference remains the country’s premier educational and networking opportunity for those who design, build, and operate sustainable laboratories. Industry professionals from around the world will experience the same high-caliber event, which will include dozens of technical sessions, symposia, workshops, and offsite evening tours on a variety of laboratory design, construction, architecture, engineering, and maintenance topics.

The conference will be held at the Minneapolis Convention Center, with accommodations at the nearby Minneapolis Hilton Hotel. Both the convention center and hotel are conveniently located in downtown Minneapolis and are easily accessible by light rail from the Minneapolis–St. Paul International Airport.

Visit I²SL’s website for more information: www.i2sl.org/conference
