

International Institute for Sustainable Laboratories I²SL High-Tech Talks

A Webinar Series for Sustainable, High-Tech Facility Professionals

Achieve your training goals, discover the sustainable laboratory community's latest offerings, and ask questions of industry experts during I²SL's High-Tech Talks.

I²SL's High-Tech Talks are monthly webinar offerings intended to educate, connect, and diversify the sustainable laboratory and high-performance facility community. Webinars work to encourage interactivity among the presenter and the audience by allowing you to ask questions of the experts or share your own expertise with a key audience.

When and for how long will the webinars take place?

The schedule for these monthly, online events is currently being developed. Webinars will run for approximately one hour.

How much does it cost to participate?

The cost is \$95 per attendee for the live webinar, or \$65 to view the recorded webinar.

What will the webinars provide?

Attendees receive an exclusive opportunity to learn about the latest trends, innovations, and success stories in high-performance facilities and have the ability to ask direct questions of sustainability experts. You may also be able to earn continuing education credits through the American Institute of Architects, Green Building Certification Institute, or other professional organizations.

How do I participate?

Once the webinar schedule is developed, you can register with I²SL for the training you're interested in. I²SL will then provide you with instructions on how to take part in the interactive webinar experience.

Potential topics for upcoming webinars include:

- Data Centers for the 21st Century
- Improving heating, ventilation, and air conditioning (HVAC) system controls
- Water efficiency
- University laboratory retrofits
- Implementation of Labs21 Tools
- International laboratory challenges and solutions
- Building high-performance facilities in challenging economies
- Presentations related to I²SL's Working Groups: Marine Laboratories, Building Information Modeling, Lighting, and Sub-Metering
- Case Studies on the above topics

I²SL is the official co-sponsor for the Laboratories for the 21st Century (Labs21[®]) 2011 Annual Conferences and Workshops.

I²SL High-Tech Talks

Want to Present?

Being a presenter allows you to speak virtually yet directly with an interested audience about your project ideas, a case study you've conducted, or a new cost saving tool you've developed. To apply to present, please submit an abstract of 250 or fewer words, plus three learning objectives to I²SL. For more information on learning objectives, and to apply to present, please contact I²SL at <labs21@i2sl.org>.

I²SL will review your submission and contact you within three weeks to let you know whether you've been selected to present. We will coordinate with selected presenters to set a date and time for presentations to take place. Presentations should have no more than two presenters, feature PowerPoint slides, last approximately 45 minutes in length, and leave room for audience questions.

To ensure that continuing education credits are available to all participants, we ask that your presentation not be a sales pitch and that your company logo be included only on the presentation's first and last slides.
