

Be Part of I²SL's Global Community!

Looking for the right product or firm to build or retrofit a sustainable laboratory? Or, are you a manufacturer or laboratory professional looking for owners interested in creating sustainable laboratories? Find what you're looking for in I²SL's new Global Community!

I²SL's Global Community

I²SL is forming a **Global Community** to help fulfill its mission to encourage and enable the development of technologically advanced, energy-efficient, and environmentally sustainable laboratories throughout the world. I²SL's Global Community will be a "one-stop-shop" for encouraging the creation of sustainable laboratories. The Global Community Web site will provide a means for laboratory owners to locate manufacturers, products, and firms offering sustainable solutions for laboratories. Find your match through I²SL's Global Community!

Who Should Advertise on I²SL's Global Community:

Providers: Manufacturers, architects, engineers, and others who can provide sustainable laboratory products and services to owners.

Owners: Universities, industry, and federal laboratory owners and operators in need of sustainable laboratory products and services.

Providers

The product and service **Providers** section of the Global Community Web site invites architects, planners, engineers, manufacturers, and related individuals and companies to promote their products, services, and expertise to laboratory owners interested in creating a sustainable laboratory facility. This section of the Global Community will be available to the general public, *free-of-charge*, via the I²SL Web site. Increase your sustainable laboratory business opportunities by listing your organization, products, and services in this exclusive directory.

Special Note for Providers: Laboratory owners may choose to add their specific Requests for Proposals (RFPs) to the Owners section of the Global Community. These RFPs will be available only to the Providers listed in the Global Community.

An introductory subscription fee of \$1,000 per year will be required for organizations who would like their information displayed as a Provider in I²SL's Global Community.

Owners

The **Owners** section of the Global Community invites laboratory owners, including academia, industry, and government, to post their RFPs and solicitations for sustainable laboratory products and services. By posting their project needs, Providers will more easily and quickly be able to respond to RFPs for Owner projects. Get started creating your sustainable laboratory by listing your RFP, *free-of-charge*, in I²SL's Global Community.

Join I²SL's Global Community

Visit < www.i2sl.org/globalcommunity > for a sample of what the online Global Community page will contain. To sign up for the Global Community, please complete the form on the next page.
