

GEORGIA CHAPTER NEWSLETTER

SUMMER 2024

Hello I2SL Georgia Chapter! We hope this finds you enjoying the start of the summer season. This year the Georgia Chapter is celebrating 5 years with renewed energy and some exciting events.

Our next event will be a virtual education session on June 26th focused on the latest from the Labs2Zero Initiative. At the heart of this initiative is the I2SL Laboratory Benchmarking Tool (LBT), a free tool through which users who input energy use and building data can rate their buildings' energy and greenhouse gas emissions through pilot Energy and Operational Emissions Scores. This education session will dig into the LBT to help us all become better at using the tool and advancing sustainability in our science spaces.

On the horizon we are also working towards additional events including building tours, golf social event, and culminating with our annual chapter meeting towards the end of the year, so stay tuned!

If you have ideas or requests for events, please reach out to Allen Doyle.

Thank you, and look forward to seeing you soon!
