If you are representing an owner on a laboratory construction or renovation project, then you should attend the 2016 I²SL Annual Conference as part of a project team! The I²SL Annual Conference is the premier event for laboratory and high-tech facility stakeholders. By attending together, the project team will have the opportunity to collaborate with one another and engage with other professionals to better understand cross-cutting issues and solutions to developing a high-performance, environmentally sustainable laboratory.

What is the project team registration discount?

The project team registration is a discounted registration option for four or more people involved with a laboratory construction or renovation project. The registration fee per person is $725, a savings of $150 or more compared to the standard registration.

Who can be part of a project team?

Project team members must be from or contracted by the organization that owns or will own the laboratory and include at least one representative from four or more of the following areas:

- Architect/planner
- Budget/financial officer
- Environmental, health, and safety officer
- Principal investigator/user representative
- Facility operations and maintenance senior staff member

How do I register as a project team?

Contact I²SL with the names and professional areas of the team members you wish to register. I²SL will send you a discount code to use when registering.

What are the benefits of the project team registration?

In addition to receiving all the typical conference registration benefits, including access to dozens of education technical sessions, quality exhibitors in the Technology and Services Fair, and networking opportunities with industry professionals, I²SL will arrange several exclusive opportunities for the project teams:

- A free informational session on Sunday, September 25, from 1:30 p.m. to 5:30 p.m. that will cover the importance of O&M training, continuous performance improvement planning, and the North American Laboratory Freezer Challenge.
- Recognition in the Opening Plenary.
- A private facilitated discussion session among all participating project teams to share experiences and expertise.
- The opportunity to meet with I²SL’s Board of Directors and I²SL Chapter officers from the project team’s region.

We look forward to seeing you at the 2016 I²SL Annual Conference!
